Have a great day! e-maxx is the new professional data deletion program from CONVAR. Using the new direct DMA support, data can be deleted from hard drives in high speed mode with speeds up to 3.3 GB per minute. This high speed is achieved by e-maxx through intelligent inspection of the PC motherboard and the hard drive controller. The software independently determines the fastest data transmission rate and achieves these exceptional speeds through optimal utilization of the DMA chipset on the motherboard of your PC. e-maxx can be started directly from a boot diskette. The deletion process is always based on the physical drive and is independent of the file system (e.g. FAT12, FAT16, FAT32, HPFS, NTFS, Ext2, Reiser, etc.) or the number of partitions.

Description: - the fastest and easiest hard drive data recovery tool - the fastest hard drive recovery program. - Can read and delete all hard drives.

In this tutorial we are going to see what is the purpose of PhotoViewer EX tool. This is a small free windows based photo viewer. It is useful in other ways like organizing, synchronizing and tagging your photos. It can view your photos in a very easy and easy way. How to extract contents from other software? PhotoViewer EX tool is a good solution for that. In this video we go over a simple process using an SMB file share to do a "find and replace" of a word in a large string. For illustrative purposes, we use the "replace" to just change one instance of a word within a string, but there are a few other interesting tricks you can use with this method to accomplish other tasks. Multiple Access card allows multiple applications, such as a PC, printer, copier, fax or scanner to access a single

card. With the help of a Multi Access card, anyone in the office can fax, copy, print, and scan documents without having to know the proper passwords and usernames. After a student uses his/her ID card to access a workstation, the student can then use his/her PC to access any network resources, such as email, the Internet or any applications installed on the computer. In this tutorial, we are going to create a classic Drop Down Menu with Ruby on Rails. In this tutorial, we are going to build a "classic" Drop Down Menu using Ruby on Rails. To build this menu, we will use HTML and CSS to create the base menu with JavaScript to make it clickable. In this tutorial, we are going to show you a method to search for folder using Windows Server 2008 R2 and C++. In this method, we are going to see how to use RegOpenKeyExEx with RegQueryValueExEx to extract information about a specific path in the registry. We have also used RegGetValueEx with important values to show how to get the Path and Value in the registry to search for files or folders. The highly-rated data recovery software for Windows built by the experts at TRIM. e-maxx will recover data from your drive when the operating system fails to boot (see F-Secure Report) or when it fails to start normally (see WinHelp). e-maxx will even recover data from a damaged, bad and worn out hard disk. When the operating system does not start normally, you will get the following message: "There was a problem starting Windows. Error 0x0000007B" or "There was a problem starting Windows. The system halted execution due to corruption of the system registry" If these messages do not help you to recover your data, you can start e-maxx, which will perform a memory test on your system. Additional e-maxx Features:

- The software uses the Windows NT/2000/XP interface.
- You can start the software directly from your boot diskette.
- You can define a custom message for each hard disk.
- It is possible to scan individual sectors to find lost files or extended files.
- The software is very fast: in fact e-maxx not only recovers your data in one go, but it only needs a few seconds to scan a damaged disk.

What's New in the?

An automated, professional disk jockey, e-maxx reads and deletes digital files from your hard drives without leaving a trace. e-maxx can shred files up to 6 times per minute: shred everything except PDF files, photos and music -- shred every file including viruses -- shred all files on a disk -- shred a CD and/or DVD, including a removable disk With e-maxx, the only thing the user has to remember is how much space is available on the drive to be deleted. e-maxx will tell the user whether they have enough space available before it deletes a file. This enables an intelligent and gradual data deletion process with the option of early cancellation. e-maxx contains the e-maxx-engine (with step-by-step tour, expert and start-up information) and e-maxx-GUI (the deletion interface) The e-maxx-GUI is designed for maximum user friendliness. It shows the main functions in one overview like the operating system's File Explorer. This enables the user to make necessary settings, such as the shredding depth, the individual shredding mode and the storage drive and media types. The main function buttons like help, start, cancel, access and exit are to the right of the overview, while the options and warning buttons are shown below the overview. The e-maxx-GUI enables the deletion of up to 9 data files/folders at a time, since the hard drive is searched for all needed data. The user can control each individual shredding task in the sequence menu. The details of how many files can be shredded at a time depend on the data input. Available shreds include files on hard drive, drive c:, hard drive, CD/DVD, USB stick, Compact Flash/e-m

COOL REASONS TO USE E-MAXX The easiest way to shred a CD/DVD Imagine getting a CD or DVD labeled "important" and having it destroyed in a few seconds. E-maxx is always ready to do the job. Just select CD or DVD and the option is on the command line. You can shred a complete disk or just a single CD track. Delete files quickly without knowing what kind of file you are deleting You can shred files by name or extension, just choose a file pattern and run e-maxx. E-maxx will only delete files whose
