[GFI LanGuard 11 License Key.rar](#)

The screenshot shows the GFI LanGuard 2011 web interface. The browser window title is "GFI LanGuard 2011". The navigation menu includes Dashboard, Scan, Remediate, Activity Monitor, Reports, Configuration, and Utilities. A "Discuss this version..." link is visible in the top right. The main content area features a "Welcome to GFI LanGuard 2011" message, stating it is ready to audit the network for vulnerabilities. Below this, there are four main action buttons: "View Dashboard" (Investigate network vulnerability status and audit results), "Remediate Security Issues" (Deploy missing patches, uninstall unauthorized software, turn on antivirus and more), "Manage Agents" (Enable agents to automate network security audit and to distribute scanning load across client machines), and "Launch a Scan" (Manually set-up and trigger an agentless network security audit). A "Local Computer Vulnerability Level" section indicates that GFI LanGuard is inspecting the security status of the local computer, with a "View details" link. A "LATEST NEWS" section lists three news items from 18-Dec-2011: "Vulnerability Database - List of supported OVAL checks", "Patch Management Database - List of supported Microsoft security updates", and "List of supported non-Microsoft security updates", each with a "Read more" link. A yellow warning banner at the bottom states "Trial period will expire in 30 days!". The status bar at the bottom shows "99%".
