3. Figure 4-3: The Brush tool can be used in various ways; in this image, a copy is made using the High Soften filter The Shadow/Highlight tool is useful for painting shadows and highlights on images. This works best with solid colored objects. Figure 4-3: The Shadow/Highlight tool is used to paint highlights and shadows The Pen tool can be used to draw various objects, such as outlines, outlines with beveling, and freeform paths. The Pen is useful for drawing freeform paths to guide a transparent mask around the object you are trying to edit. You can then paint with the Pen over the mask to edit the details of the original object in a separate layer. The Eraser is used for erasing unwanted objects in an image and also to delete objects. You can also use the Eraser tool to make selections and erase objects. The Magic Wand is used for making selections. It's ideal for dealing with large selections of an image. The Magic Wand also helps you to quickly select adjacent areas of objects in an image. The Lasso tool can be used for making selections, either in the image itself or on a selected layer. The Selection brush allows you to paint in the color of your choice directly on a layer, like a watercolor painting. The Selection brush is useful for creating a tonal or color layer in a different image and then painting it into the appropriate layer of your image. The Sponge tool allows you to paint a selection onto a layer. You can paint areas you don't want in a layer with the Sponge. The Dodge and Burn tools can be used to give objects a soft, or grainy, or crisp, or shadowed appearance. The Smudge tool allows you to smudge the edges of an object. The Blur tool allows you to soften or sharpen a selected area or a layer of an image. You can also use the Blur tool to apply a blur to a layer and blur the entire image by pressing Shift+Ctrl+Alt/Option+Shift+Alt+S. The Live Sharpen tool allows you to sharpen an image's shadows and smoothen its highlights. You can also use the Live Sharpen tool to sharpen the entire image by pressing Ctrl/Command+K. You can also use the tool to soften the shadows and sharpen the highlights of a selected area. The Sponge tool allows
